SUMMARY

Recent Information Technology graduate from Brawijaya University specializing in full-stack web development. Experienced in building scalable RESTful APIs, optimizing database performance, and translating UI designs into clean, maintainable front-end code. Strong interest in developing reliable and high-performance web applications.

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, TypeScript, PHP, Golang, Rust

Query / Markup Languages: SQL, HTML5, CSS3

CSS Frameworks: Bootstrap, Tailwind CSS

Frameworks: Laravel, React, Vue, .NET Core, Gin, GORM

Databases: MySQL, PostgreSQL, MongoDB, Neo4J, Redis, Firebase

Tools: Docker, Kubernetes, CI/CD

Version Control: Git (GitHub, GitLab, Bitbucket)

CERTIFICATION

Microsoft Office Desktop Application

TrustTrain

• Certificate of Achievement with Excellent Grade

March 03, 2026

Certificate No: 26UBC03128432

WORK EXPERIENCE

Software Engineer

PT. Lautan Air Indonesia (Lautan Luas Tbk. Group)

Apr 2026 – Present

Tangerang, Banten

- Analyze business processes and gather requirements from users to design and develop internal business applications
- Build full-stack web applications using Laravel, React, Laravel Inertia, PostgreSQL, and MongoDB
- Collaborate with business users to translate operational requirements into scalable digital solutions
- Design system architecture, database structures, and application workflows to support business process digitalization
- Manage application testing, User Acceptance Testing (UAT), production deployment, and issue resolution
- Implement new features, optimize existing systems, and perform ongoing maintenance based on user feedback and business requirements

Project-based Full Stack Web Developer

PT. Aksamedia Mulia Digital

July 2025 – Oct 2025

Surabaya, East Java

- Implementing Front End and Back End code for a data management and book inventory system using Laravel and React
- Redesigned the invoice creation and book selection workflow for the admin role
- Built an integrated cart/invoice feature connecting admin and partner dashboards
- Refactored backend logic to support the new invoice flow and book stock management

Full Stack Web Developer Intern

PT. Aksamedia Mulia Digital

Feb 2025 – June 2025

Surabaya, East Java

- Built full-stack features by converting Figma designs into React components and implementing supporting back-end services and logic using Laravel and React
- Reduced API response time from 10 seconds to 400–600 ms by optimizing database indexes, queries, and service-layer logic
- Improved performance of high-volume data endpoints by refactoring repository and service layers

Laboratory Teaching Assistant of Advanced Programming

Faculty of Computer Science of Universitas Brawijaya

Feb 2024 – June 2024

Malang, East Java

- Enhancing the practical skills of Object Oriented Programming Concept on Java for 40 students by leading 16 practicum sessions
- Evaluate students' proficiency in Java programming by providing feedback on their work

- Create case study examples that are easy for student to understand for each material provided

Laboratory Teaching Assistant of Basic Programming

Aug 2023 – Dec 2023

Faculty of Computer Science of Universitas Brawijaya

Malang, East Java

- Enhancing the practical skills of basic Java Programming for 40 students by leading 16 practicum sessions
- Making assessment questions in the form of 'live-coding' with the aim of improving students' coding and problem-solving skills
- Evaluate students' proficiency in basic Java programming by providing feedback on their work

ORGANIZATION EXPERIENCE

Basic Computing Community Filkom UB

Apr 2024 – Present

Member of Back-End Department

- Becoming a speaker at Back-End department workshops and inter-departmental workshops
- Contribute to projects involving members from the Product Management, Front-End, Back-End, and Product Design departments

EDUCATION

Brawijaya University

Malang, East Java

Bachelor of Computer Science; Major in Information Technology

Aug 2022 – Jan 2026

- Award: Third runner up on PKM-RE at Filkom Dekan Cup 2022
- Thesis: Performance Improvement of Client-Side Image Processing using WebAssembly (Case Study: Gaussian Blur Filter)
- Cumulative GPA: 3.95/4.0
- TOEFL ITP score of 562 taken from Brawijaya Language Center (unofficial score report available)

PROJECTS

Friend Recommendation System

Nov 2025 – Dec 2025

Back-End Service (RESTful API)

Node.js, TypeScript, Neo4j, MongoDB, Docker, Kubernetes

- Designed and implemented a microservices-based backend system using graph and document-oriented NoSQL databases
- Built a graph-based friendship and recommendation engine using Neo4j to model user relationships
- Implemented a recommendation algorithm combining mutual friends and shared interests with weighted scoring
- Developed a scalable showcase service using MongoDB with sharding to distribute data across categories
- Applied Clean Architecture principles by separating handler, repository, and database layers
- Containerized and deployed services using Docker and Kubernetes for local orchestration
- Project Repository: <https://github.com/Syahreza-Ferdian/Friend-Recommendation-System>

Computy-AI

Sep 2024 – Nov 2024

Back-End Service (RESTful API)

Golang, Gin, Gorm, PostgreSQL, Redis, WebSocket, Docker

- Designed and developed a RESTful API service using Golang for an AI-powered learning platform specializing in Computer Science.
- Integrated an AI model to dynamically generate course based on user input.
- Implemented Redis for user session management and WebSocket for real-time chat feature.
- Created comprehensive integration tests to ensure seamless interaction between backend services, AI model, and the database.

Restologi

Apr 2024 – June 2024

Back-End Service (RESTful API) and Mobile App

Golang, Gin, Gorm, MySQL

- Designed and developed a mobile application for restaurant food ordering
- Implemented payment processing and receipt download features
- Designed and built backend service to handle payment requests and transaction processing
- Project repository: <https://github.com/Syahreza-Ferdian/Restologi>

Heal-in

Feb 2024 – Mar 2024

Back-End Service (RESTful API)

Golang, Gin, Gorm, MySQL

- Built a fully functional RESTful API to support application features and integration with Midtrans as a payment gateway
- Collaborated with Front-End developer to integrate Back-End service into the web application
- Project Repository: <https://github.com/Syahreza-Ferdian/heal-in>

Restaurant Web App

Nov 2023 – Dec 2023

Web App

Laravel, MySQL

- Designed and developed both front-end and back-end features, including menu display, search, and filtering, for a restaurant ordering web application
- Project repository: <https://github.com/Syahreza-Ferdian/Project-Akhir-PAW>
